

Welcome to the MasterClass Class 1 Transcript

Uranus called the class to bring in instruction sets for the new energy . This is a co-creative class calling those who are ready to create. This is a great step in learning how to use your light body now that the seeds have been sown within you for your light body. The idea of this masterclass is to master your energy. The seeds are now ready to sprout and see the light of day. Analogous to the first quarter of a the planting cycle. The movement from terrestrial beings to universal beings. We will be introduced to our guides and learn how to converse with them.

The format of this series is not set yet. I will first share the pieces I have received and turn it over to Uranus.

In this class as we begin to open to the universal aspect of ourselves. In order to do this, we may need the assistance of guides. Much of the previous and historical information of the LightBody is not available on this planet at this time. There are minimal resources to look up the instructions in academia or in our libraries. It is for this reason our guides are wishing to share the knowledge with us in a live class to those ready and willing to play with the LightBody. For the most forbidden subject is the Lightbody. Lightbody is disclosure at the top level.. So consider we are doing disclosure at a profound level. There is congratulations and acknowledgment that we are doing some great learning together. The content will be revealed as we proceed.

These tools are going to be presented very slowly, so imagine we are just playing in a sandbox. So in essence we can not get anything wrong , we are just learning to be comfortable playing in this small sandbox of our LightBody if you will.

The planets and eventually the stars will come in to be our guides. Think of yourself in kindergarten with teachers around you to answer your questions but as far as your play and how we are playing with each other is what we are

learning. Our commitment to play here is acknowledged. Our tremendous growth of the last several years has prepared us to play here now and why we now have front row access. So this is a key point, the recognition that you have support and guidance throughout the process.

We are now working in 5D. Our solar system friends are guiding us are in 5d. What is coming to present itself in this class is their 5d consciousness. We are not limited to 5d access however to have teachers emanating 5d consciousness will be most helpful as we learn to access and connect with their consciousness forms. While we are in 5d we can go to higher dimensions but our mission is to create the 5d earth so we are beginning to play predominantly in 5d.

The planets have multiple dimensional aspects like ourselves however in the sandbox and for purposes of learning our plasma bodies and creating with our LightBody we will choose 5d. It has been observed our relationship with the whales and the Venus council. He have seats at the table on the Venus council, we have already accessed our 5d connection with Venus and this is why we are getting additional planetary teachers as we have successfully connected and conversed with Venus and her consciousness. So additional planetary teachers will be helpful to have as we begin creating.

Our initial image is that we are in the sandbox and just given a brand new box of colored crayons and each color represents the planetary influences to color our creations.

Cleansing Our Own Consciousness Field

We first begin by developing and deepening our connection with our very quiet still point. We already know how to achieve our still point however we are going to go to this still point with a little more consciousness. We will begin with the image of an octahedron.

Place yourself in an octahedron and place your attention on the bottom most point. Allow this point to become a growing needle downwards, which goes into a zero point however you visualize the zero point. This neutral point is so anchored and firmly attached it is permanent. As we now move into our interior

space, begin spinning our octahedron counterclockwise. Spin at whatever rate you choose and whatever rate feels comfortable. You may wish to maintain the visual image of a permanently anchored still point anchored into a still point connected to earth, our Sophianic Cosmic Christos Mother. The connecting needle is constructed with a universal plasmic material so feel that it is permanent at whatever rate of spin we choose. Feel this connection as home. Spin our octahedron field to remove debris. Spin this octahedron field frequently while we reside in a chaotic field. And because we are operating in a chaotic field, is also why our planetary friends have shown up. This exercise is a cleansing mechanism for our consciousness field.

This inner awareness of spinning our octahedron firmly anchored into your zero point, performed multiple times a day or hourly if needed, is a very quick visual exercise to spin off debris so you maintain a clean and clear orb.

Things to Keep in Mind

While attending the Venus Council in June we all received a cleansing ritual. We began sensing and feeling the tones on the inside of our body. We were asked to feel the tones of the muscles to register the tension levels. We did not necessarily need to change the tone although we could, we needed to be familiar with our own interior tone, muscles and organs. To know this tone.

Secondly, recognize our mental play, looping thoughts etc. Notice how familiar we are with aligning our selves with a mental correction thought or creation. We were introduced to correcting our alignment by emotional field connection or emotional play. So we were asked to more often be in emotional play rather than mental play in our interior zones. This is an upgrade of our interior zone to be in a state of emotional play. Can we be aware of how we facilitate emotions? This is a step on the way to LightBody Mastery. Developing our awareness of how we facilitate the movement of our emotions. Even becoming witty and intelligent with our emotional play. This enables us to claim a lot more of ourselves.

(This is a synopsis of the June 3 Venus Salon Meeting) see full recording.

Solar Reishi and Uranus enter our group field

A combination of energies are coming in to share now, the Solar Reishi and Uranus. First we wish to point to two pieces in our advanced Lightbody study. It is part of your mission of all of you to move into your LightBody. You will feel this as a greater resonance as you begin to play with these exercises and the information here. You may feel more and more aligned with your mission. When this occurs, a greater alignment with your mission on earth, there is an influx of life-force energy into your field. So welcome this influx of energy. You may attribute it to the planetary information you are receiving today, however it is actually your own life force returning to you and coming on board.

This self sourcing and self-claiming of your energy production is what you are learning how to do. Self-sustaining and Self-creating. It is important to understand as you are drawing to your mission, this life force energy to you, that you also understand and allow the energy to move through you outward and create with it.

Another reason our teachers have shown up now is so that we begin to utilize this influx of energy, that we begin to tap into it and not walk away from this influx. It is not necessary to dismiss this power and go back to what is familiar. Please be assured you have not had the opportunity to know your full volume or energy capacity. This is why we would like to be very close at this time, on your shoulder or standing right next to you, so we are close enough to be perceived when you ask for assistance in particular situations. So we are there when you are tempted to turn your incoming volume of energy down we will be there to assist you in mastering the flow.

Many tools you are aware of as they are in our DNA. However, given the current terrain and the interference in your world, the Solar Reishi are bringing in new tools to use. This is another reason we are presenting and making ourselves available to you now. In summary, we wish you to have the resources,

to know how to ask us for guidance. To not dismiss what is happening in your body. Our guidance we expect is necessary. These tools you are using are needed here on this planet. We have created this play area for you and observation area for us so we can support you. Again, you can not get it wrong. As you all know there is no room for self-doubt in 5D. You are exploring what you can do.

Solar Reishi recognize that we have already on a previous occasion have portaled into the sun together on a call. Let us unpack this a little bit. **Where to find us?** Which is in essence what this series is about. Where to look? How do you know we are there? How to feel us? How to ask us questions? How to get the information you are looking for.

First and foremost it is on the inside of your body. It is an internal process. However ironic it may seem that we as solar beings reside in the sun so far away, yet, in order to connect with us you will need to go to a still point the inside of your body. The more still we are and the more adept we are in going to the quiet sanctuary in our heart, is where we will feel the Solar Reishi and their resources.

Secondly, we will point to the third eye. We are developing our internal sight the pineal gland much more acutely. So we can see the pictures they are drawing, or the sounds they are delivering or however you and your celestial friends choose to converse. Our planetary friends are very versital. And we as humans are waking up and we can choose our modalities. We can choose modalities to develop, or choose modalities that are already open or modalities we have an aptitude for.

The third eye development is crucial. To learn to see with this engaged. The third eye, in the center of our head, has been honed well as a result of being a member of this group. The skills are opening and now we are using this third eye to observe what is happening on the inside of the body first. As you know what is on the inside of your body is a mirror to what is happening. Remembering the

hermetic axiom,

“As above so below, as within so without”

We will be addressing the latter half of this axiom., as within so without.

This articulation of the third eye with your physical eye, works as a triad to scan the inside of your body for the connection points, with the Solar Reishi and Uranus. That is all we are addressing for today. The Sun and Uranus. The irony is that they are making it simple right? Just two of the planets today.

Uranus is coming to the podium. Mary you can blame me for your erratic heart and you as well Mary Anne for I have been sending lightening bolts of high frequency energy and throwing them in your field. Often, you catch them. What I am actually doing is increasing or spiking your energetic field in an effort to pop a ceiling or pop a balloon in order to allow you new heights of energy frequencies that you can now access. It would have been a slower process without these spikes to pop your ceiling so to speak.

You now have the ability to modulate now so that it need not be so extreme. But it requires paying careful attention to when I am knocking on your cell doors per se to share a message.

Uranus in the sky today is in the sign of Taurus, which is a grounded energy. In a way Taurus is a slower moving consciousness field, actually one of the slowest moving consciousness fields. Think of these lightening bolts as now going through, or can through a slowing down effect, so our energetic system that is learning to read incoming energies can begin to decipher these. In a sense, we are slowing the frequencies hitting the body.

There are other planets doing his bidding, or delivering the Uranian messages through their frequencies. These planets are now in Aquarius. What do we mean by that? We mean those frequencies we wish to deliver now are closer in

frequencies to your own planet now as they are being distributed through the closer planets to earth than Uranus.

Uranus is bringing in a lot of the new ideas and new energy technologies and the way we are perceiving energy. We are learning that energy takes a form, a geometric form. These forms coming from the planet Saturn are closer to us than Uranus energy forms. We are currently more familiar with Saturnian forms of energy. We will go more into these platonic solids at a later date.

While your body is still changing energetically to the 5d we recommenced lots of water, calcium, magnesium. You are still alchemizing to these energies. You will continue to be alchemizing to these new energies for at least 6 months. We are here for your questions, as you are feeling them as you perceiving them.

We are now pointing to the whales and expressing much gratitude for the whales in assisting us, teaching us of bubbles, play and heart smiles.

Uranus is now picking this theme up and introducing our universal play for this class is to think of ourselves as an orb. To become an orb, identify with being an orb of light, a plasma orb, a holographic energy field that is morphable inside from the heart. As you reside in the hologram, working masterfully as a holographic consciousness. You have played with this orb idea a lot in your work and now it will take on a more primary role, in your day. We have all been fascinated with orbs showing up and coming in to our awareness. That is how we as planets, Solar Reishi as well we come to you as holographic orbs of light. Then we coalesce with your energy field and the cetaceans. The whales are very adept at creating a universal field one that is easy to access. Easy for higher consciousness fields forms such as us and easy for you in order that we can share in our process and learning together.

Idea: As you walk, move and proceed in your day consider yourself a an orb, or a plasma field, or a consciousness field. And you breathe, you are breathing to fill up that entire orb space not just your physical body. You are breathing an orb space. So that you become familiar with yourself as an energetic field. Yes this

orb zooms to the size that you want. Till we meet again in 2 weeks, this idea, of walking, moving and experiencing moving about in your day as an orb is your play. This is part of your readiness and part of your mission.

One of the advanced features of this play is that you are learning the holographic qualities of an orb. You are always whole. There is never a depletion. You can move or shift or extend or even blow a piece of this orb out yet you are never less than, You can give and share pieces of this orb. There is never a depletion in your orb space, volume or energy. Your breathing and your hearting is the locomotion of the orb. This rate determines the speed, rate of spin, etc of your orb. We are not saying play with orb travel at the moment, just begin to feel the breath as each part of your body and begin how to feel how your breath and the depth of your breath contributes to your sense of your orb. The feeling, breathing and feeding your orb. When you are feeling depleted try tuning in to how the orb. Observe how it can nourish you. We look forward to hearing your experiences next time.
